

25.00 Signage

The requirements of this Section are Mandatory.

25.01 Generally

This Section defines the signage requirements, both Statutory and General, required on all projects for GU.

Refer to the Project Signage Schedule contained in 'Appendix A' to this Section for details of signage types, responsibility for supply and installation and the general location of signs.

The Head Consultant or Contractor must consult with and seek the approval of CLF on the extent and type of all signage to be installed in the project prior to finalising the tender documentation or the Total Project Sum.

25.02 Statutory Signage

The Contractor shall supply and install all Statutory signage in accordance with the requirements of the BCA.

25.03 Braille & Tactile Signage

Braille and tactile signage shall be used where required by the BCA.

All signs including directory boards that are within normal reach, shall be Tactile signs except where nominated later in this Section, stated on the Standard Signage Drawings or directed by CLF.

25.04 Room Signage

In addition to the requirements of GU Standard Signage Drawing GSS – 208, 'Push' and 'Pull' signs are required to all doors in public spaces and to Lecture Theatres.

25.07 Perspex Signs

Signage other than that specifically detailed in the GU Standard Signage Drawings, shall comply with the requirements outlined on GU Standard Signage drawing GSS – 310, comprising vinyl
